

"MULTI Matrix" — An Innovative Business System for Entrepreneurs

Welcome to the presentation dedicated to the opportunities of "MULTI Matrix" — a business system designed to scale your enterprise and increase your income.

We will explore the key features, advantages, and operational mechanisms of this unique matrix model.

Marketing Features of "MULTI Matrix"

"MULTI Matrix" offers a unique approach to business, combining stability and dynamism.

We've gathered the key features that make our system stand out.

Matrix-Based Business Model

The foundation of the system that ensures a clear structure and predictable growth.

Business Structure Management System

Tools for effective control and optimization of your team and platforms.

Automatic Duplication of Business Positions

"Clones" that expand your structure and generate additional income.

Six Business Platforms

Step-by-step growth and income increase at each new level.

Four Types of Income

A multi-channel profit system designed for maximum financial return.

Four Types of Income

Main Income from the Marketing Plan —

When specific positions in your business platforms are filled, you receive payouts according to the marketing plan.

Income Duplication —

The marketing system creates additional business positions (clones) with their own platforms. These can also close and generate income according to the marketing plan, just like your main business position.

Referral Bonus —

The marketing system includes additional cash rewards for closing the platforms of your partners whom you have invited.

Referral Bonus Duplication —

Your partners also receive additional business positions (clones). The marketing system includes a process that allows you to earn referral bonuses from your partners' clones as well.

Unique Marketing Features

"MULTI Matrix" stands out among other systems thanks to its unique features that give you full control and maximum efficiency.

Intelligent Structure Management

The built-in function allows you to strategically direct the flow of additional business positions (clones) to close the most priority spots on your platforms.

This enables you to purposefully support your team members and significantly accelerate overall progress across business platforms.

Efficient Duplication of Business Positions ("Clones")

Clones are not just copies of your main position. Each clone functions as a fully independent business asset: it earns payouts and referral bonuses, has its own business platforms, creates new clones, and actively participates in platform closures.

Their main purpose is to ensure stable income and support advancement within the system.

Flexible Expansion and Reinvestment Opportunities

- The ability to purchase additional business positions at your discretion.
- "Next Position" Function.
- In the final business platform, a reinvestment feature is provided — it creates a new business position within the same platform, ensuring continuous cyclical income.

First Business Platform: The Starting Point

At the core of the "MULTI Matrix" system lies a seven-seat binary, non-splitting matrix. The cost of one business position is **15 TON**. You can also purchase additional positions on this platform at the same price.

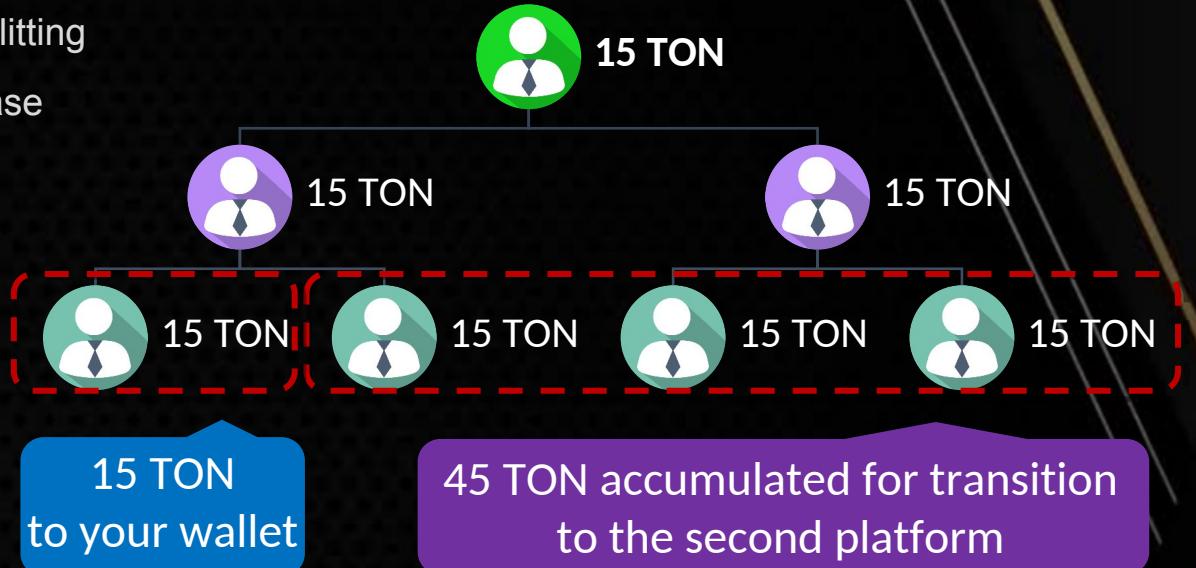

How It Works:

- The top of the matrix: your position.
- First line (2 positions): the lower positions of the partner positioned above you.
- Second line (4 positions): your second-level positions.

Income: Closing any of the four lower positions brings you **15 TON** directly to your wallet.

Transition to the next platform:

Once the remaining three positions in the second line are filled, you earn a total of **45 TON**, which are automatically used to open your second business platform.

Second Business Platform: Expanding Opportunities

Once your first platform is completed, you automatically receive a position in the second matrix. The cost of an additional position on this platform is 45 TON.

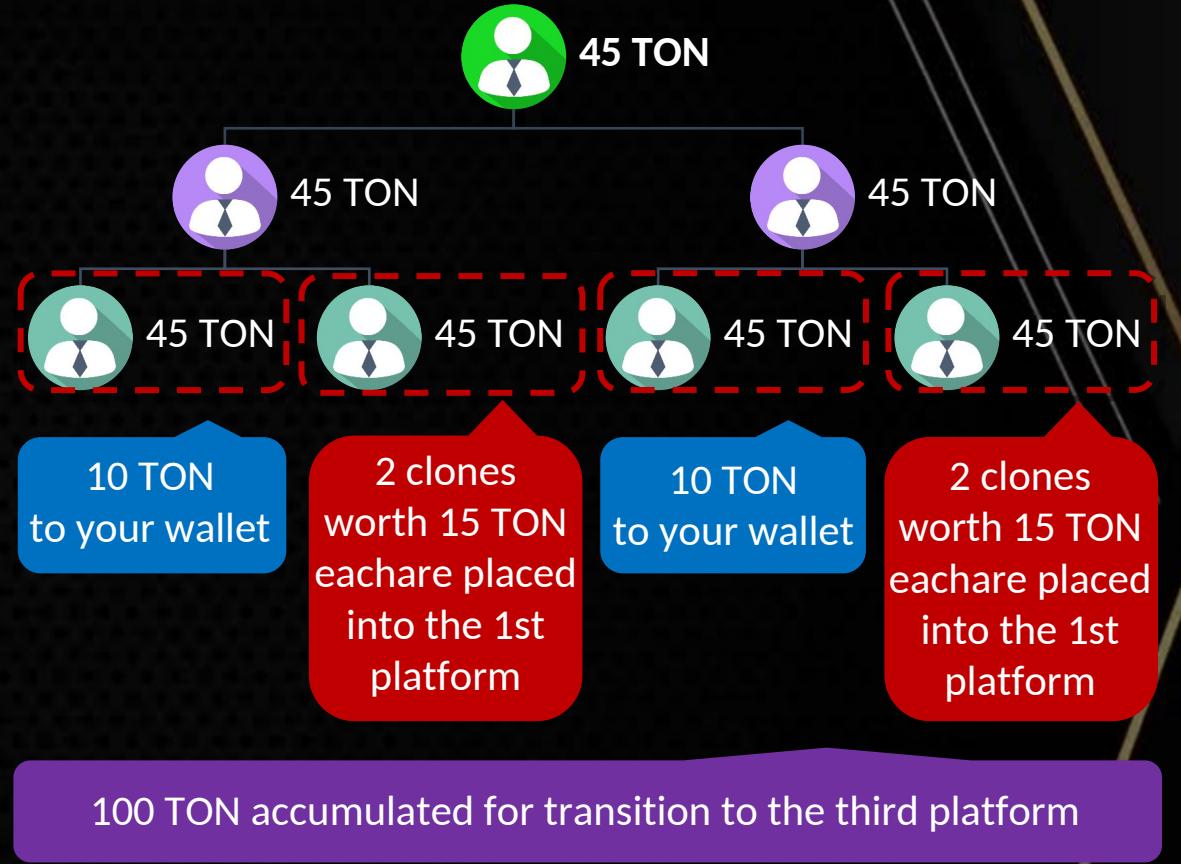

Process and Income:

- Top of the matrix: Your position.
- First and Second lines: Same as on the first platform.

Two types of income from the second line:

- Closing the 1st and 3rd positions brings you 10 TON directly to your wallet.
- Closing the 2nd and 4th positions generates 2 clones worth 15 TON each, which are placed into the first matrix, strengthening your structure.

Transition to the third platform: Once the second line is fully closed, 100 TON are accumulated and automatically used to activate your third business platform.

Third Business Platform: Accelerating Growth

After completing the second platform, you automatically move to the third one.

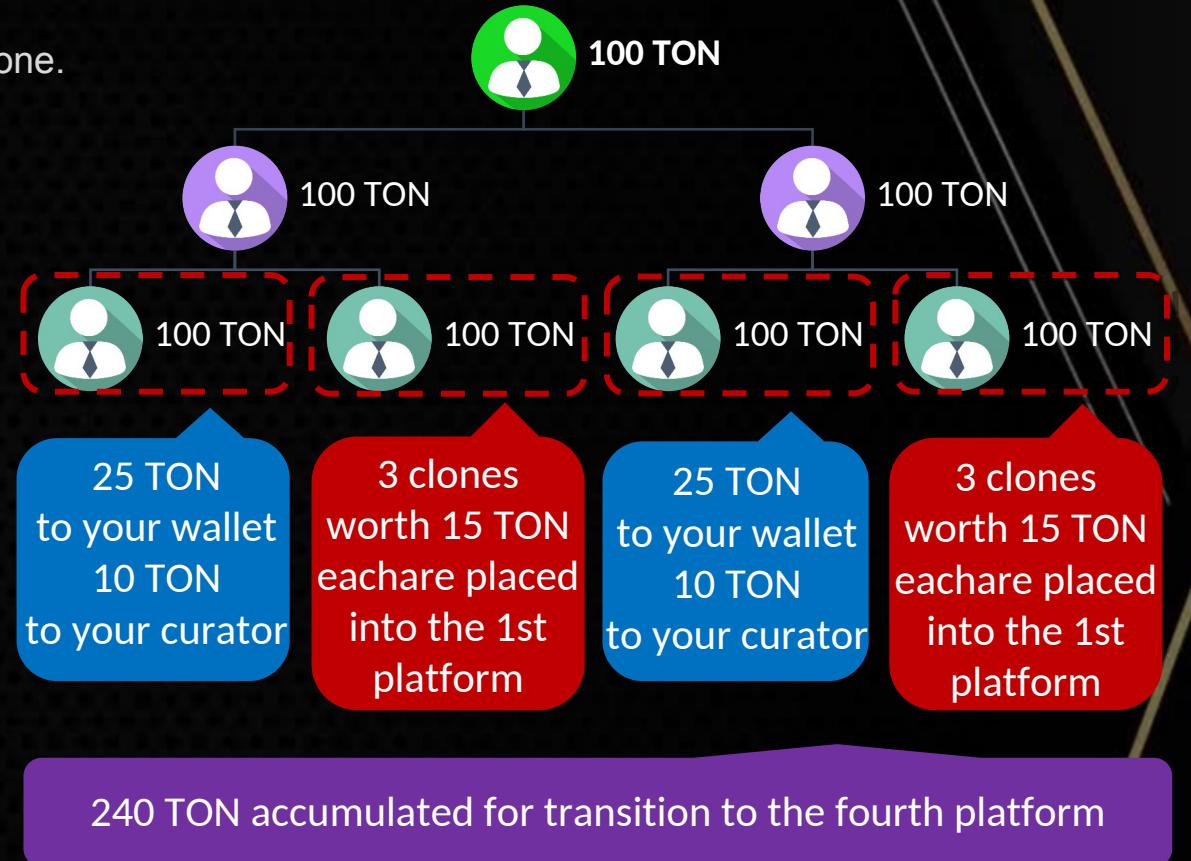

Additional positions on this platform can be purchased for 100 TON.

Mechanics and Benefits:

- **Your position:** The top of the third matrix.
- **Partner placement:** Same as on the previous platforms.

Two types of income from the second line:

- Closing the 1st and 3rd positions brings you 25 TON directly to your wallet, and your curator receives a 10 TON referral reward.
- Closing the 2nd and 4th positions generates 3 clones worth 15 TON each, which are activated in the first matrix, significantly strengthening your base structure.

Transition to the fourth platform:

When all positions in the second line are filled, 240 TON are automatically accumulated to open your fourth business platform.

Fourth Business Platform: Scaling Income

After completing the third platform, you automatically move to the fourth one.

Additional positions on this platform can be purchased for 240 TON.

Profitability and Growth:

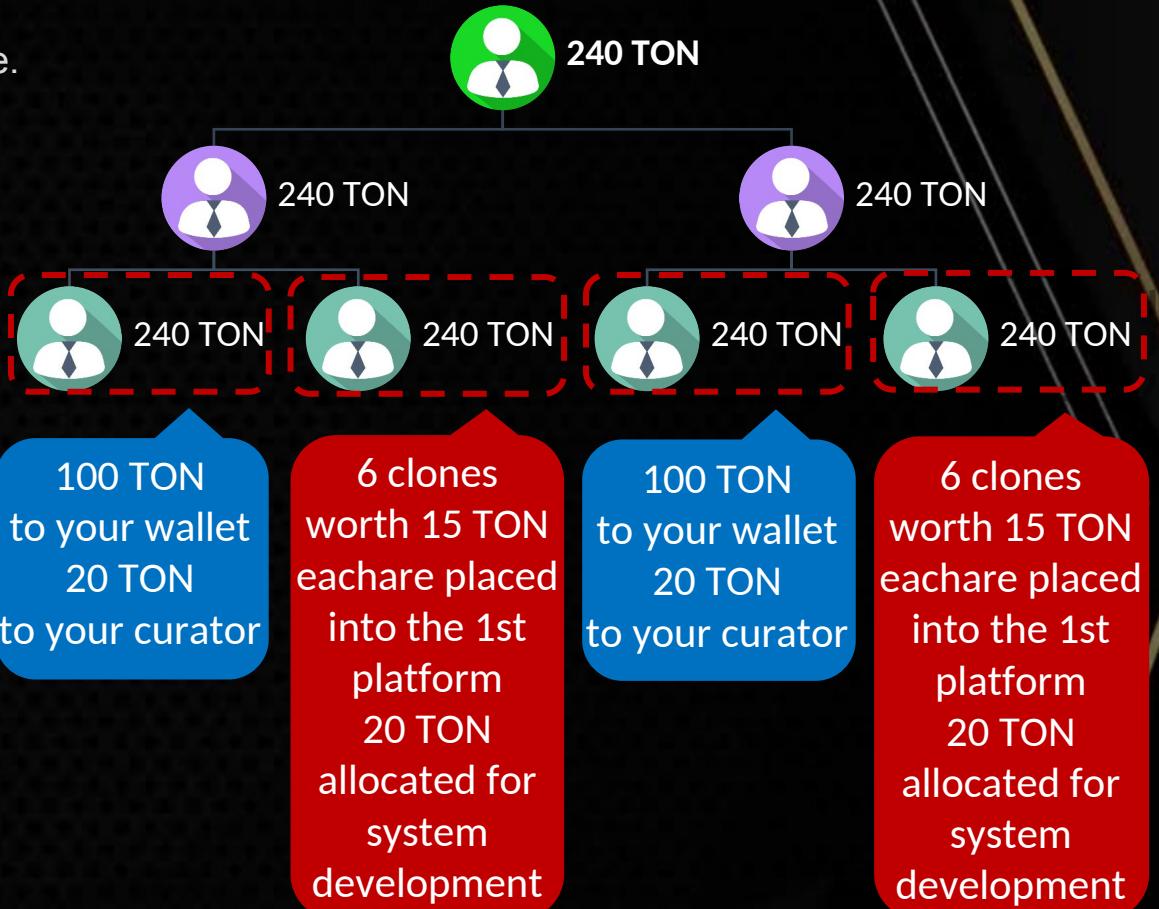

- **Your position:** The top of the fourth matrix.
- **Partner placement:** Same as on the previous platforms.

Two types of income from the second line:

- Closing the 1st and 3rd positions brings you **100 TON** directly to your wallet, and your curator receives a **20 TON** referral reward.
- Closing the 2nd and 4th positions generates **6 clones** worth **15 TON** each for the first matrix, significantly expanding your network, while **20 TON** are allocated to system development.

Transition to the fifth platform:

When all positions in the second line are filled; **500 TON** are automatically accumulated to open your fifth business platform.

500 TON accumulated for transition to the fifth platform

Fifth Business Platform: Breakthrough to Major Income

Automatic transition to the fifth platform occurs after completing the fourth one.

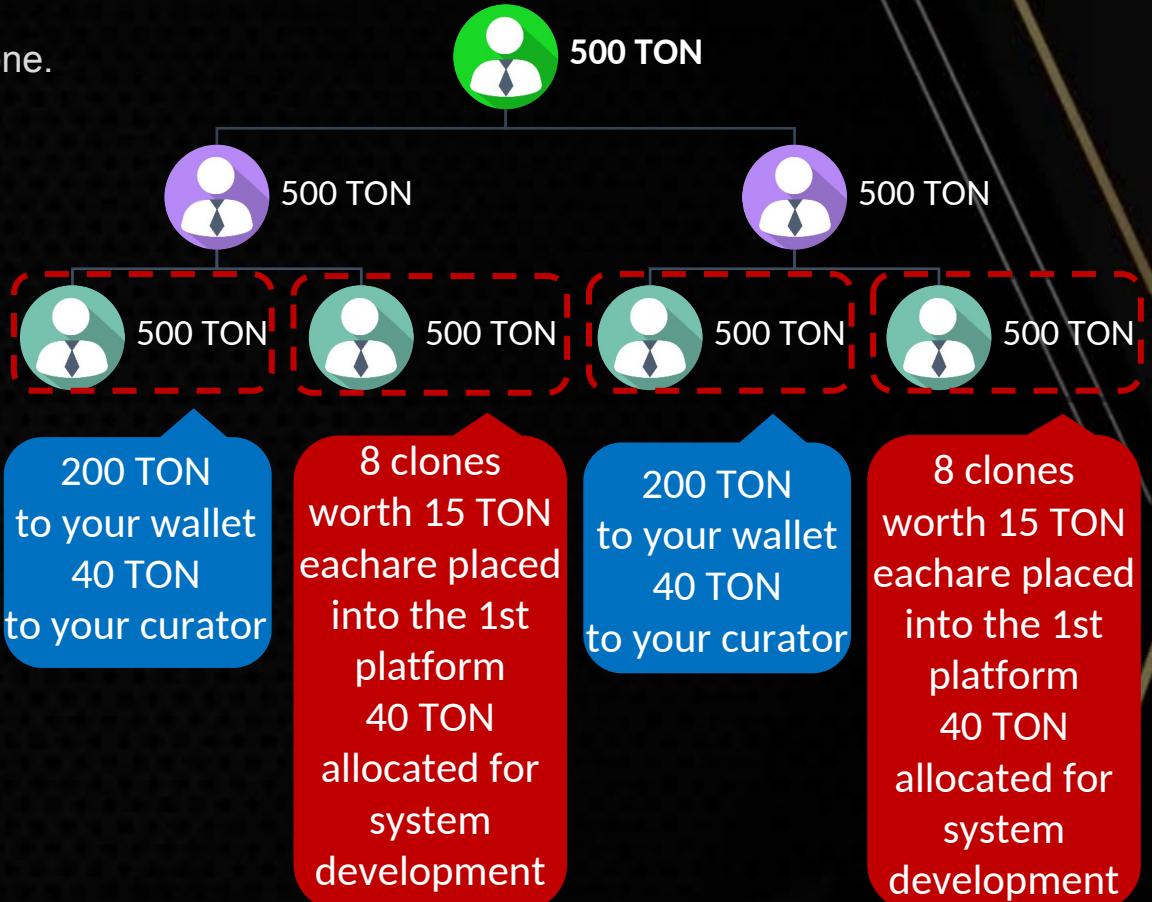

Additional positions at this level cost 500 TON.

Opportunities at this level:

- **Your position:** The top of the fifth matrix.
- **Partner placement:** Same as on the previous platforms.

Two types of income from the second line:

- Closing the 1st and 3rd positions brings you 200 TON directly to your wallet, and your curator receives a 40 TON referral reward.
- Closing the 2nd and 4th positions generates 8 clones worth 15 TON each for the first matrix, creating strong momentum for your entire structure, while 40 TON are allocated for system development.

Transition to the sixth platform:

When all positions in the second line are filled, 1,200 TON are automatically accumulated to open your sixth and final business platform.

1,200 TON accumulated for transition to the sixth platform

Sixth Business Platform: The Final Goal and Reinvestment

The sixth platform is the pinnacle of the "MULTI Matrix" system, opening the way to maximum profit and continuous income through the reinvestment mechanism. The cost of an additional position at this level is 1,200 TON.

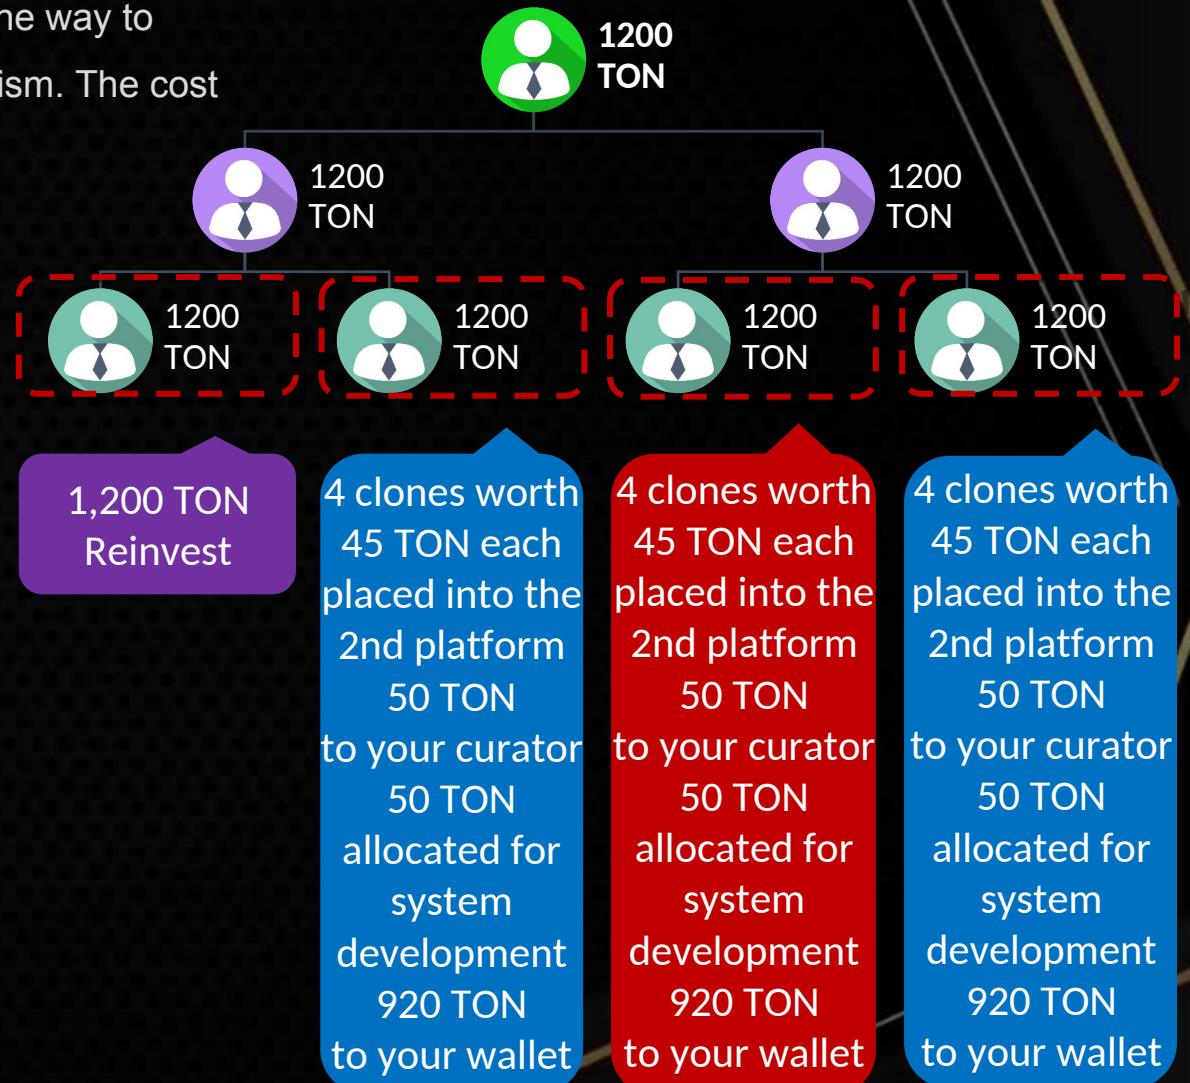

Income and Reinvestment:

- **Your position:** The top of the sixth matrix.
- **Partner placement:** Same as on the previous platforms.

Closing the first position in the matrix triggers

REINVEST (1,200 TON). A new position (clone) under your account automatically takes a free spot in the same platform, ensuring continuous profit generation.

- **For each of the three remaining closed positions, you receive:**
 - 4 clones worth 45 TON each placed into the second matrix, ensuring continuous growth.
 - 920 TON directly to your wallet.
 - Your curator receives a 50 TON referral reward.
 - 50 TON are allocated for system development.

Overall Income Summary from a Single Business Position

This table demonstrates the earning potential and the growth of your “clone” structure from a single main business position as you progress through all six platforms.

1	15 TON	0	0
2	20 TON	4	0
3	50 TON	6	20 TON
4	200 TON	12	40 TON
5	400 TON	16	80 TON
6	2760 TON	12 clones in the 2nd matrix	150 TON
Total:	3 445 TON	50	290 TON

3,445 TON in direct income, **50 new clones** to strengthen your structure, and **290 TON in referral bonuses** — this is your result from a single main business position, not including the ongoing reinvestment on the sixth platform and additional clones.
